WORK EXPERIENCE

Frontend Developer

Science Infinity Technology Limited, Sep 2025 - Jan 2026, Hangzhou, China

AI media generation platform with end-to-end user workflows

- Built a reusable vertical video feed supporting dynamic video sources, custom playback controls, and active video state management for optimized video rendering
- Implemented persistent global favourite state management using Zustand and localStorage, maintaining synchronization across list, detail, and favourite views
- Built a reusable upload component supporting multiple AI generation modes through dynamic request parameter configuration

Review Submission & Admin Management System

- Built a review submission workflow with screenshot upload, request tracking, and client-side validation, improving user feedback and preventing invalid API submissions
- Implemented multi-condition search and filtering for the admin moderation module, optimizing search inputs with debounce to minimize redundant API requests
- Fixed multi-select filter logic to handle multiple tags on a single item, ensuring accurate result counts and preventing items from being incorrectly filtered out
- Built a functional prototype of a document management module utilizing Prisma ORM, PostgreSQL, and Supabase, covering schema design and rich-text CRUD workflows
