Xiaonan Dong

Tel: 0617762416 Email: xiaonand14@gmail.com Portfolio Rotterdam(willing to relocate)

Frontend developer with commercial experience building AI-assisted media workflows, web applications, mobile WebView interfaces, and internal administration tools. Currently based in the Netherlands and authorized to work under an Orientation Year permit.

SKILLS

Frontend: JavaScript, TypeScript, React, Next.js, HTML, CSS, Tailwind CSS
State & Data: Zustand, SWR, REST APIs
Backend & Data: Node.js, xpress, Next.js Route Handlers, Prisma ORM, PostgreSQL, Zod
Tools: Git, GitHub, Postman
Languages: Mandarin (Native), English (Professional), Japanese (JLPT N2), Dutch (A2)

WORK EXPERIENCE

Frontend Developer, Science Infinity Technology Limited Sep 2025 - Jun 2026, Hangzhou, China

Developed user-facing AI media-generation workflows, responsive web and mobile WebView experiences, and internal review and administration tools.

- Built a reusable vertical video feed with custom playback controls and active-slide playback management, ensuring that only the visible video remained active during transitions.
- Developed reusable upload components for multiple AI generation modes using configurable request parameters, covering file uploads, asynchronous generation requests, and result rendering.
- Implemented persistent favourite state using Zustand and localStorage, keeping status synchronized across list, detail, and favourite views.
- Developed administration and moderation features including debounced multi-condition search and hierarchical multi-select tag management.

PROJECTS

Invoice Analyser Aug 2026

Next.js, TypeScript, Express, PostgreSQL, Prisma, Amazon S3, Amazon Textract Live Demo | Code

- Built an asynchronous document-analysis workflow, tracking external jobs through polling and persisting structured results to PostgreSQL for review and editing.
- Designed failure-safe file processing with S3 cleanup, paginated Textract result retrieval, and backend normalization to decouple AWS response structures from the frontend data model.

Workspace Booking Dashboard Jul 2026

Next.js, TypeScript, PostgreSQL, Prisma, Zod, Recharts Live Demo | Code

- Built a responsive workspace management dashboard with URL-based filtering and end-to-end booking workflows, including runtime validation, duplicate-slot prevention, cancellation/restoration, and loading/error states.
- Transformed relational PostgreSQL booking data into operational metrics and charts covering slot availability, booking activity, and workspace-type distribution.

EDUCATION

MA in Music Management (Merit), The University of Sheffield Sep 2021 - Nov 2022, UK

BA in Musicology, GPA: 83/100, Shandong University Sep 2017 - Jun 2021, China
