Frontend-focused developer with commercial React experience and hands-on full-stack experience building applications with TypeScript, APIs and relational data. Based in Rotterdam and authorized to work full-time in the Netherlands under an Orientation Year (zoekjaar) permit.

SKILLS

Frontend: JavaScript, TypeScript, React, Next.js, HTML, CSS, Tailwind CSS

State & Data: Zustand, SWR, REST APIs

Backend & Data: Next.js Route Handlers, Prisma ORM, PostgreSQL, Zod

Tools: Git, GitHub, Postman

Languages: Mandarin (Native), English (Professional), Japanese (JLPT N2), Dutch (A2)

WORK EXPERIENCE

Frontend Developer, Science Infinity Technology Limited

Sep 2025 - Jan 2026, Hangzhou, China

Developed user-facing AI media-generation workflows, responsive web and mobile WebView experiences, and internal review and administration tools.

- Built a reusable vertical video feed with custom playback controls and active-slide playback management, ensuring that only the visible video remained active during transitions.
- Developed reusable upload components for multiple AI generation modes using configurable request parameters, covering file uploads, asynchronous generation requests, and result rendering.
- Implemented persistent favourite state using Zustand and localStorage, keeping status synchronized across list, detail, and favourite views.
- Built a review submission workflow with screenshot upload, client-side file validation, submission feedback, and request history tracking.
- Developed administration and moderation features including debounced multi-condition search and hierarchical multi-select tag management.

PROJECTS

Workspace Booking Dashboard, Independent Project

Jul 2026 - Present

Next.js, TypeScript, PostgreSQL, Prisma, Zod, Recharts

[Live Demo](#) | [Code](#)

- Built a responsive workspace management dashboard with URL-based filtering, booking creation, cancellation and restoration, editable workspace records, and route-level loading states.
- Implemented end-to-end booking workflows with runtime validation, loading and error feedback, duplicate-slot prevention, and refreshed data after mutations.
- Transformed relational booking data into operational metrics and charts covering slot availability, booking activity and workspace-type distribution.

EDUCATION

MA in Music Management (Merit), The University of Sheffield

Sep 2021 - Nov 2022, UK

BA in Musicology, GPA: 83/100, Shandong University

Sep 2017 - Jun 2021, China
