WORK EXPERIENCE

Junior Frontend Developer

Science Infinity Technology Limited, Sep 2025 - Jan 2026, Hangzhou, China

Context: Frontend development for an AI-assisted content generation SaaS platform used across web and mobile WebView applications

AI media generation platform with end-to-end user workflows

Tech Stack: React, TypeScript, Zustand, Swiper, i18n, RESTful APIs

- Built a reusable media preview carousel supporting dynamic video sources, managing active video playback states during sliding to optimize rendering performance
- Implemented cross-page favorite state management using Zustand with localStorage persistence, synchronizing favorite status across lists, detail views, and favorite views
- Developed an end-to-end user workflow for AI content generation, covering upload initiation, async request handling, and result rendering in the app/WebView interfaces

Review Submission & Admin Management System

Tech Stack: React, TypeScript, Zustand, Ant Design, RESTful APIs

- Built a review submission flow (screenshot upload, request submission, history tracking), implementing frontend file validation and upload feedback to prevent invalid backend requests
- Developed an admin moderation interface with multi-condition search, optimizing search inputs using debounce to reduce unnecessary backend API requests
- Handled complex hierarchical multi-select tag logic by normalizing parent-child relationships, ensuring accurate checkbox linkage and consistent UI selection states
